181 A Syntax-Error-Handling Technique and Its Experimental Analysis
Seppo Sippu, Eljas Soisalon-Soininen
October 1983 **ACM Transactions on Programming Languages and Systems (TOPLAS)**, Volume 5 Issue 4
Publisher: ACM Press
Full text available: pdf(1.52 MB) Additional Information: full citation, references, citings, index terms

182 Providing mark-up and feedback to students with online marking
David V. Mason, Denise M. Woit
March 1999 **ACM SIGCSE Bulletin , The proceedings of the thirtieth SIGCSE technical symposium on Computer science education SIGCSE '99**, Volume 31 Issue 1
Publisher: ACM Press
Full text available: pdf(834.42 KB) Additional Information: full citation, abstract, references, citings, index terms

Online marking of assignments can lead to improved marking consistency and integrate well with on-line mark reporting. It can also be easier for the marker. Unfortunately, most such systems do not include good feedback mechanisms for the students. This paper describes an environment that provides online marking with convenient, structured and detailed feedback.

183 ALGOL 68 and your Friendly Neighbourhood Operating System
C. H. Lindsey
May 1978 **ALGOL Bulletin**, Issue 42
Publisher: Computer History Museum
Full text available: pdf(1.15 MB) Additional Information: full citation, index terms

184 Workstation at Carnegie Mellon
Bruce Arne Sherwood

Voluntary Results Feedback Form

- *I am an examiner in Workgroup:* ☐ *Example: 2133*
- *Relevant prior art **found**, search results used as follows:*
  - ☐ 102 rejection
  - ☐ 103 rejection
  - ☐ Cited as being of interest.
  - ☐ Helped examiner better understand the invention.
  - ☐ Helped examiner better understand the state of the art in their technology.

Types of relevant prior art found:

- ☐ Foreign Patent(s)
- ☐ Non-Patent Literature
  (Journal articles, conference proceedings, new product announcements etc.)

- *Relevant prior art **not found:***
  - ☐ Results verified the lack of relevant prior art (helped determine patentability).
  - ☐ Results were not useful in determining patentability or understanding the invention.

Alerting Abstract US A1
NOVELTY - A static **marker file** is provided in **loaded** computer system **software**, for indicating whether **loaded** computer system **software** is **loaded** in a computer manufacturer's **factory**, loaded by a system restoration compact **disk (SRCD)**, or loaded by **downloading** an **image**.
DESCRIPTION - An INDEPENDENT CLAIM is also included for recorded medium storing computer system **software load** process determination program.
USE - For determining load process of computer system software including operating system (OS) such as windows OS, LINUX and Microsoft (MS) word, device drivers, compiler, assemblers, linkers and utilities.
ADVANTAGE - Enables a computer to send the **marker file** to a central authority when a program running on the computer is terminates abnormally.
DESCRIPTION OF DRAWINGS - The figure shows the flowchart explaining computer system **software load** process determination method.

Delivery of customer specific software installation for computer systems Alerting Abstract
...NOVELTY - The software transport system (100) is used to deliver **software installation** (102) a new computer (104), e.g. a personal computer. The data is provided by a data base (116) and is used by a **CD-**

ROM drive (118) to provide mass produced **CD**-ROM discs. This loaded onto the new machine using a booting program contained on a **floppy** disc. ...118 **CD**-ROM drive Original Publication Data by Authority...**Original Abstracts:**system for supplying a software image to a computer system utilize a custom-programmed compact **disk (CD)** ROM that is configured for a specified individual computer system and constrained to be downloaded... ... the software state that the computer was in at the time the computer left the **factory** after initial configuration and downloading. The custom-programmed **CD** ROM **106** is delivered to a customer in combination with a bootable flexible diskette **108, and** an instructional technical instruction sheet for usage by the customer to restore the computer system to a "factory new" software condition. ...**Claims:**a software image, the software image being configured for downloading to and execution on a **single** unique computer, said **software** transport medium including a first tag identification file having an identification tag keyed to an **identifier** of **the** computer; anda **software** download medium storing a download program, the download program for controlling a downloading of the software image to a storage of the computer, said **software** download medium including **a** second tag identification file having an identification tag keyed to the identifier of **the** computer **and** an identification tag **identifying** the first tag identification file,wherein said software transport medium, said software download medium, **and** the **computer** are mutually keyed so that the software image is downloadable to the storage of only... ... first tag identification file via identification information in the second tag identification file, accessing the **identifier**, mutually **comparing** the identifier **to** the identification tags **in** the **first** and second tag identification files, and transferring the software image from the software transport medium to **the** storage **only** if the identifier corresponds to the identification tags.

Alerting Abstract US A1
NOVELTY - The update **file** entries are **marked** except the group of files which are determined to be new. The **marked** update **file** entries are deleted.
DESCRIPTION - INDEPENDENT CLAIMS are included for the following:

1. Scheduled file updates ensuring apparatus;
2. Computer program product for storing the newest version ensuring program.

USE - For ensuring if scheduled file updates are applied with regard to existing versions, during software installation in a factory.
ADVANTAGE - Ensures that the newest version of file is installed on a computer system.
DESCRIPTION OF DRAWINGS - The figure shows the flowchart of the operation of the schedule file updates ensuring method.

Patent Details

Patent Number	Kind	Lan	Pgs	Draw	Filing Notes
US 5793982	A	EN	25	14	

Alerting Abstract US A
The **method** involves examining a pair of application **data** structure corresponding to **indicated** transport and redirector module to be used for **software installation** on a workstation. The availability of the indicated transport and the redirector module is determined during installation process. Whenever the unavailability of any one module is detected, a data structure corresponding to the unavailable module is added to the installation plan.
ADVANTAGE - Assures availability and compatibility of redirectors, and transports at workstation. Enables user to select set of communication modules for installation purpose.
